

Hello,

I listen to several radio stations that I can only receive through FM translators, K-Love and Calvary Chapal Network. These are both Christian radio stations that are broadcast nationally. There is only one local Christian radio station in our area. If you were to take the translators off the air, I would not be able to hear the programs that these two stations offer. These national networks offer programs that are not available in our area by any other means and would be greatly missed by many in our area.

Please do not "Localize" and replace our translators with Low Power FM. We are not in a high population area and we would lose our variety and choices of stations and programs if our current stations were not available to us.

Thank you.
